

Combining our affordable MoCap cameras or a commercial available camera with our MaxPRO software, we are able to give you the capabilities of those “proprietary, hi-end expensive optical systems” at a fraction of the cost.

MaxPRO was designed with all our customers needs in mind. A truly affordable solution to fit any budget. Included are all the advanced features to meet and exceed every aspect of your 3D motion capturing requirements. Flexibility is the key to MaxPRO . You have the ability to interface with a wide range of cameras. Not all cameras are equal. We can fit the right camera for your application.

## Features and benefits

- Tracker can handle any high speed camera
- Use up to 32 cameras
- 3D tracking in one camera view
- Dynamic Wand calibration
- Creates C3D and ASCII files
- Track up to 255 markers/points
- Integration of analog
- QuickID for fast marker identification
- Marker templates with name, size and color + stick figure defining
- Hide/Show all buttons for identified and unidentified tables
- Delete or filter out short trajectories
- Interpolation
- Filters
- Graphs
- Coordinate System translation and transformation
- 6DOF output
- Analysis/Calculations (tools) angles, velocity, acceleration with MaxA
