

MaxBIKE

Using Video Motion Analysis in the Bike Fitting Process

MaxBIKE software paired with a Logitech C922 WebCam provides an easy to use entry level dynamic Bike Fitting system that will provide you the parameters that you need to fit bikes to their riders at a low cost.

Impress your customers with this very simple, yet powerful tool. You can show the rider a visual of their pedaling technique in slow motion, making sure proper form is used to produce power, be biomechanically efficient and avoid injury. The most important item, your customer will walk away feeling confident with their purchase and the service provided from their new favorite bike store.
